

Here the pump being connected to the D-cell box:

Here the pump being connected to the transformer (the pump is in the bowl, you only see the cord and on/off switch). It can be plugged into an electrical outlet now.

Placement of the “place holder” in the D-cell box when using 3 batteries :

For a softer stream of water, use 3 batteries instead of 4. Use the copper tube as shown below in place of the 4th battery.
